

I have recently discovered that after we switch away from analog the ability of the average viewer to determine the level of filth coming into their homes will be lowered. This is not acceptable to be. Please help us get back our right to watch clean TV. Please require the satellite and cable companies to make the appropriate parental controls available to the public. Remind them that it is not only right, but good business to do so as it will allow more channels to be viewed by a larger audience. This means more money in their pockets.

Thank You

Ashley Wheeler
