

I do not think it is fair that the communication industry refuses to give me, a parent of a young child, who cares about what does and is exposed to in my home. I want the option to have the TV Guardian installed in my area via Comcast, to allow me to filter what is seen and heard on my TV. I am sick of the fouled mouth shows that you allow to fill our air waves. It is no wonder why crime is rampant in America. Please do not deny me of my options. Let us make a difference in our homes, to have the tools to help me teach my child what is right and wrong. Thank you.
