

Advanced parental control technology should be made available for filtering offensive content in TV programming and movies; whether viewed on TV, over the Internet, cable, satellite, DVD Players, Blu-Ray Players, gaming consoles, or other video devices...

Millions of homes have already benefited from automatic foul language filtering technology through TV Guardian, which uses the existing hidden closed-captioning signal to detect and mute offensive language.

I want foul language filtering technology on TV, cable, satellite and other devices that show TV programs and movies.

Thanks for your consideration
