

Advanced parental control technology should be made available for filtering offensive content in TV programming and movies; whether viewed on TV, over the Internet, cable, satellite, DVD Players, Blu-Ray Players, gaming consoles, or other video devices.

Millions of homes have already benefited from automatic foul language filtering technology through TV Guardian, which uses the existing hidden closed-captioning signal to detect and mute offensive language. I have heard that tv broadcasters (tv stations) will no longer be offering foul language filtering technology available after the SWITCH TO DIGITAL TELEVISION. I am writing to voice my opinion insisting that this technology be made available when the switch to digital occurs.
