

FCC Chairperson The software for filtering foul language technology must be built into the cable/satellite boxes and TVs to work with HD televisions. It is being offered to cable and satellite companies for free -- those that want to use it can pay a small fee for it -- and these companies have the ability to download the software into most existing cable/satellite boxes... still, the industry refuses to give families this individual control.

I like to have the power to gain control over the language that is heard on the TV's in my own home! Cable and satellite companies should give parents the option of using these parenting tools just because it's good business. This technology will even increase profits for them since filtering out language makes more TV shows and movies OK for family viewing. Yet, a handful of powerful media companies are fighting to keep this technology from me. FCC let the free market work. FCC let me have a choice.

FCC I want foul language filtering technology on TV, cable, satellite and other devices that show TV programs and movies.

My family and I say we don't like the language in TV and movies...well here's a way to do something about it! Please S.O.S. American families from this sharks of malice and bad intentions. FCC I count on you to help America protect her children. Thank you.
