

Please make advanced parental control technology available for filtering offensive content in TV programming and movies - whether viewed on TV, over the Internet, cable, satellite, DVD Players, Blu-Ray Players, gaming consoles, or other video devices. The innocence of our children is in the balance. This makes sense for families' peace of mind and conscience, and also for content providers because more content will be acceptable and viewed by families. Thanks for your time and consideration of this very important matter.
