

I urge you to take action on this issue of usage caps for broadband users. These Telecom and Cable Conglomerates are doing nothing but propping up their bottom line and stifling consumer choice. If I decide I want all of my video content to be delivered over the Internet as opposed to signing on to a particular cable providers services, I should be able to do so without fear of data caps that will ultimately impact my pocket financially. This is ridiculous and counter-productive. Please work to put a stop to this sooner rather than later.
