

FOUL LANGUAGE FILTERING TECHNOLOGY WILL NO LONGER BE AVAILABLE AFTER THE SWITCH TO DIGITAL TELEVISION THIS SUMMER UNLESS YOU TAKE ACTION.

The software for this technology must be built into the cable/satellite boxes and TVs to work with HD televisions. It is being offered to cable and satellite companies for free -- those that want to use it can pay a small fee for it -- and these companies have the ability to download the software into most existing cable/satellite boxes... you must allow families to have control over what enters their homes. Cable and satellite companies should give parents the option of using these parenting tools. Filtering out language makes more TV shows and movies OK for family viewing. Yet, a handful of powerful media companies are fighting to keep this technology from the public. You , the members of the FCC must let the free market work. Parents need to have a choice. You must nsis that legislation be passed to secure that choice for parents. Thank YOu Betty Phillips
