Re: CC Docket No. 94-102,  
95% ALI-Capable Handset Penetration Requirement,  
Rule Section 20.18(g)(1)(v) and Related Requirements.

Thirteenth Quarterly Report

Dear Ms. Dortch:

By Order (CC Docket No. 94-102), FCC 06-41, released March 30, 2006 (the "Order"), the Commission granted the Filer, Copper Valley Wireless, Inc., extensions of time within which (1) to meet the ALI-capable handset activation deadlines and (2) to meet the Rule Section 20.18(g)(1)(v) 95% ALI-capable handset penetration deadline. The Filer has elected to deploy a handset-based E-911 solution.

Specifically, under the relief granted by the Order:

1) The Filer was granted until February 27, 2007 to begin selling ALI-capable handsets, and to ensure that 100% of all new handset activations are ALI-capable, in the areas served by the Valdez, Glennallen, Lake Louise, Willow Creek, Tolsona Ridge and Paxson Cell Sites (*i.e.*, the six cells slated for construction during the Summer 2006 building season).

2) The Filer was granted until February 25, 2008 to begin selling ALI-capable handsets, and to ensure that 100% of all new handset activations are ALI-capable, in the areas served by the remaining cell sites, which were slated for construction during the Summer 2007 building season.

3) The Filer was granted until February 25, 2009 to meet the requirement that 95% of the handsets on the system be ALI-capable.

In regard to the foregoing, it should be noted that (as stated in previous reports filed in this Docket) 100% of all new handset activations since December 2005 have been ALI-capable for the Code Division Multiple Access ("CDMA") air interface.

This report is submitted pursuant to the requirements of Paragraph No. 20 of the Order, and is as follows:

**Item 1: The number and status of E-911 Phase II requests from Public Safety Answering Points (“PSAPs”), including those requests that the Filer may consider invalid:** By letter dated March 2, 2009, the Filer received a request for Phase I and Phase II E-911 service from the Department of Emergency Services for the Matanuska-Susitna Borough. The Filer has not received any other PSAP requests for E-911 Phase II service.

**Item 2: The dates on which E-911 Phase II service has been implemented or will be available to the PSAPs served by the Filer’s system:** E-911 Phase II service has not been implemented on the Filer’s system. In accordance with Commission requirements, E-911 Phase II service will be implemented within six months following receipt of a valid PSAP request, absent an extension of time from the Commission or an alternate deployment date obtained from the requesting PSAP. The Department of Emergency Services for the Matanuska-Susitna Borough has indicated its willingness to allow an alternate deployment deadline.

**Item 3: The status of the Filer’s coordination efforts with PSAPs for alternative 95% ALI-capable handset activation and penetration dates:** Not applicable. The Filer has met the 95% ALI-capable handset penetration requirement.

**Item 4: The Filer’s efforts to encourage customers to upgrade to ALI-capable handsets:** The Filer has met the 95% ALI-capable handset penetration requirement; and the Commission’s Rules allow the Filer to continue service to up to 5% of units on the system that are not ALI-capable.

**Item 5: The status of the Filer’s ordering and installing CDMA network upgrade equipment for each of its cell sites:** Not applicable. The Filer has met the 95% ALI-capable handset penetration requirement.

**Item 6: The status of the Filer’s sales and activation of ALI-capable handsets in areas served by each of its cell sites:** Not applicable. The Filer has met the 95% ALI-capable handset penetration requirement.

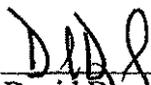

**Item 7: The percentage of the Filer’s customers with ALI-capable phones:** As of January 24, 2008, ninety-eight and four-tenths percent (98.4%) of the handsets on the system were ALI-capable.

**Item 8: Until the Filer satisfies the 95% penetration requirement, detailed information on the Filer's status in achieving compliance, and whether the Filer is on schedule to meet the revised, February 25, 2009, deadline:** Not applicable. The Filer has met the 95% ALI-capable handset penetration requirement.

Very truly yours,

**Copper Valley Wireless, Inc.**
