Re: ***EX PARTE NOTICE***

ET Docket No. 04-186; Unlicensed Operation in the TV Broadcast Bands
WT Docket Nos. 08-166 and 08-167; Revision to Rules Authorizing the
Operation of Low Power Auxiliary Stations in the 698-806 MHz Band

Dear Ms. Dortch:

On May 26th, 2009, Shure Incorporated (“Shure”) had a telephone conference call with Angela Giancarlo, Legal Advisor to Commissioner McDowell, to discuss WT Docket Nos. 08-166 and 08-167, and ET Docket No. 04-186. Participating in this teleconference on behalf of Shure were Mark Brunner, Senior Director, Global Public Relations and Edgar Reihl, Principal Engineer, along with Catherine Wang and Troy Tanner of Bingham McCutchen LLP, outside counsel to Shure.

During this teleconference Shure applauded the Commission’s recognition of the broad public benefits provided by wireless microphones in the Second Report and Order (“Order”) in ET Docket No. 04-186, and discussed how the combination of safeguards set forth in the Order are necessary to protect wireless microphones from interference from unlicensed Part 15 devices allowed to operate in the core television frequencies. Shure reiterated several of the positions raised in its Petition for Reconsideration in ET Docket No. 04-186, including that the protections in the Order are complementary and must be retained and introduced collectively to offer wireless microphones meaningful protection

With respect to WT Docket Nos. 08-166 and 08-167, Shure reiterated its position as set forth in its Comments and Reply Comments. Shure also discussed its view that the Commission can issue an order appropriately addressing the principal issue in the proceeding -- that is, whether and on what terms and conditions secondary low power auxiliary service devices, including wireless microphone systems, should migrate out of the 700 MHz band -- without addressing other issues collateral to the proposed migration including whether and how to reclassify various uses of wireless microphones under the Commission’s Part 74 rules. Shure emphasized the need for the Commission to issue a specific date for the migration of wireless microphones out of the 700 MHz band, and

recommended a 2 year transition period. Shure also provided an update on its ongoing voluntary efforts to educate wireless microphone users and dealers about the Commission's proposed changes to rules permitting secondary low power auxiliary service in the 700 MHz band and to encourage use in other spectrum.

If you have any questions regarding this meeting, please do not hesitate to contact the undersigned.

Very truly yours,
