

I am complaining about the lack of "a la carte channels" on Buckeye CableSystem in Toledo, Ohio. All I want is FOUR HDTV stations, and I have to buy four PACKAGES to be able to get these four HDTV stations when my TV has a built-in cable tuner! This is wrong. I should not have to pay for sports channels I do not want. I should not have to pay for 200 channels I do not want to watch. All I want are FOUR channels on their HDTV tier of channels, and I cannot do that yet. Please insist on "a la carte" cable TV services that provided you have their cable box, you can "go online" and select ONLY what channels you want for a 1-month time period, and be allowed to change the selections online once a month. Can the FCC enforce a la carte programming to reduce the annual cost increases from the one and only one cable TV provider in my city? Thanks for permitting me to voice my opinions.
