

I live in wapato. "Embarq" is the only internet, phone, tv provider. they refuse to give me DSL because they dont want to upgrade equipment. I live half a mile past the city highschool...

in Carolina, Embarq is fighting to stop local municipalities from starting Fios Fibre lines.

they are fighting to stop competition and I have no broadband.

I really hope the digital tv conversion will bring me a uncensored internet. god knows chinas internet is all censored. i love legal porn.
