## COMMENT DATE ESTABLISHED FOR REPORT ON RURAL BROADBAND STRATEGY

GN Docket No. 09-29

**Comments Due: March 25, 2009**

Through this Public Notice, we seek comment on Congress's directive in the Food, Conservation, and Energy Act of 2008 (2008 Farm Bill) that the Chairman of the Commission develop, in consultation with the Secretary of the Department of Agriculture, a comprehensive rural broadband strategy.<sup>1</sup> Congress, this Commission, and the Secretary of Agriculture have repeatedly recognized the importance of ensuring access to advanced telecommunications and information services to all Americans, with a special focus on rural and hard-to-serve areas. We now issue this Notice guided by Congress's recent requirement that the Commission develop a comprehensive national broadband plan.<sup>2</sup> With a renewed focus on the importance of interagency and intergovernmental coordination, and with an ever-increasing understanding of the profound impacts of broadband services on the ways we communicate and of the importance of broadband to the future of our nation, we expect that the rural broadband strategy developed in this docket will inform our effort to develop a comprehensive national broadband plan pursuant to the Recovery Act.

Broadband services have great potential to bring opportunity to the citizens of rural America. They improve the educational opportunities of children and adults everywhere, allowing children in rural areas across the country to access the same information as schoolchildren in urban areas. Telemedicine networks made possible by broadband services save lives and improve the standard of healthcare in sparsely populated, rural areas. For businesses in rural areas, access to broadband services is just as critical. These services are creating new jobs, while enabling skilled employees to work more effectively in their current jobs. At the same time, the Commission and the Department of Agriculture have recognized that rural consumers are doubly vulnerable: that is, although they are most in need of access to advanced telecommunications capability to overcome economic, educational and other limitations, they are also the most likely to lack access precisely because of these limitations.

Congress has also highlighted the importance of promoting interagency coordination in meeting the rural broadband challenge. On May 22, 2008, Congress adopted the 2008 Farm Bill.<sup>3</sup> Section 6112

<sup>1</sup> Pub. L. 110-246, 122 Stat. 1651 (Jun. 18, 2008) (June 18, 2008 Bill).

<sup>2</sup> American Recovery and Reinvestment Act of 2009, Pub. L. No. 111-5, 123 Stat. 115 (2009) (Recovery Act).

<sup>3</sup> We note that the 2008 Farm Bill was initially enacted on May 22, 2008. See Pub. L. 110-234, 122 Stat. 923 (May 22, 2008) (May 22, 2008 Bill). The May 22, 2008 Bill, as enacted, however, did not include one title (*i.e.*, Title III – Trade) that Congress had intended to include. The June 18, 2008 Bill corrected this omission by repealing the May 22, 2008 Bill and enacting a statute that includes Title III but otherwise is identical to the May 22, 2008 Bill. The June 18, 2008 Bill specified that it would take effect on the earlier of the enactment date of that bill or the enactment

of that statute requires the Chairman of the Federal Communications Commission, in coordination with the Secretary of Agriculture, to submit a report to Congress describing a comprehensive rural broadband strategy within a year of the passage of the Act. The Act specifies that the report shall include:

(1) recommendations—

- (A) to promote interagency coordination of Federal agencies in regards to policies, procedures, and targeted resources, and to streamline or otherwise improve and streamline the policies, programs, and services;
- (B) to coordinate existing Federal rural broadband or rural initiatives;
- (C) to coordinate both short- and long-term needs assessments and solutions for a rapid build-out of rural broadband solutions and application of the recommendations for Federal, State, regional, and local government policymakers; and
- (D) to identify how specific Federal agency programs and resources can best respond to rural broadband requirements and overcome obstacles that currently impede rural broadband deployment; and

(2) a description of goals and timeframes to achieve the purposes of the report.<sup>4</sup>

We invite comment on how the Commission and the Department of Agriculture should implement section 6112. In particular, we invite suggestions regarding the substantive recommendations to be included in the report, as well as proposed goals and timeframes to achieve the purposes of the report. Interested parties may file comments on or before March 25, 2009. All pleadings should reference **GN Docket No. 09-29**.
