Federal Communications Commission
445 12th Street SW
Washington, DC 20554

Re: A National Broadband Plan for Our Future, GN Docket No. 09-51

Dear Ms. Dortch,

Free Open unregulated Internet is the reason the USA has been able to lead the world in this medium and all its associated services and products. Please keep it sacred and untouched. Creation of government involvement although tempting will bring with it powerful lobbies and special interests that have the potential to stifle individual creativity and entrepreneurship while opening new avenues to corruption. In crafting the national broadband plan, the Federal Communications Commission must protect Internet users from corporate gatekeepers who seek to keep prices high and speeds slow, limit access to content and stifle innovations and market choice. Net Neutrality must be a basic and enforceable rule of the Internet. The plan must also ensure that every American -- regardless of their race, income or location -- can connect to broadband at prices everyone can afford. Allowing powerful corporate interests to dictate the future of modern communications is a mistake. Since!
