Re: A National Broadband Plan for Our Future, GN Docket No. 09-51

Dear Ms. Dortch,

i have been an internet user since the beginning, and i am now 100% disabled. i rely on the internet to work, to connect, to survive a very lonely existence. i see what happens when big corporations take over any medium, o my! look at television! look at television news! i have to seek the truth elsewhere because main stream media like cnn, fox, msn, have all become the places of one opinion show after another. i have t5vmonde from france, and every few hours, REAL NEWS from around the world is broadcast. we americans are kept in the dark about everything excpet the "issue of the day", usually concerning some partisan proposition or other and argued by the same retired politicians hour and hour until we want to pull out our hair! so please, don't listen to corporations that tell you the internet is working! we americans citizzens are here to tell you it's working just fine and that everything i need to live my life is freely given on it. ifwe allow corporations to divvy up! the spoils of the net, people like me won't have access! the access will go to the highest bidder like everything else! the internet is our last stand for democracy, for equality. don't take it away,we are all begging you.keep the internet FREE.
