

Regardless of the FCC's contention that this is an issue for the FTC, it is EXACTLY the FCC who made this bargain with SiriusXM, and it is the responsibility of the FCC to police this agreement. Page 47 of the Memorandum Opinion and Order and Report and Order states clearly what SiriusXM may charge, and it is clear their current rate hike is in excess of the allowable amount.

I therefore call on the FCC to perform its required function and investigate this violation of the terms of the Memorandum Opinion and Order and Report and Order immediately, and take whatever action it deems fit upon the conclusion of its investigation, including the revocation of satellite and terrestrial licenses, should it determine SiriusXM has violated the Memorandum Opinion and Order and Report and Order.
