

We strongly support the petition, recently filed by the Alabama Commercial Mobile Radio Service Emergency Telephone Services Board, to reject TracFone Wireless Inc.'s ETC self-certification that it is in compliance full compliance with the applicable 911 and enhanced 911 obligations of the State of Alabama. Their statement that they are in compliance is blatantly false in more than one way; the two major ones being the support of the 911 systems financially as mandated by state law, and location identification as mandated by the FCC.

TracFone should not be allowed to continue as an ETC until they comply with the laws of the State of Alabama and the mandates of the FCC.

Charles L. Webb, Board Chairman
