

I would like to comment on 560 and 970 AM WGAN in Portland Maine. These two stations do not broadcast in the local interests. Today we had a tornado and severe weather warnings in the area which is very unusual for Maine. These two stations will not break away even for a warning of an impending emergency from their programming. This has happened more than once during power outages, snow storms and other natural disasters. One of the stations has local broadcasts in the morning but the rest of the programming is not local. I would like to put in a complaint about these two stations that they are not operating in the best interests of the community. I know that this something that can be done when they are up for a licence renewal so I'm not sure if this complaint can be registered or not but I feel very strongly about this. Thank You.
