

I am all for paying for channels individually. I have a problem with paying for channels that I do not care to watch. I also have a serious problem with local stations that prevent cable providers from showing programming from other stations. I feel that this practice is an infringement of my rights as a consumer. I pay for cable for the variety that it allows, however this practice prevents me from enjoying this basic right. I strongly urge the powers that be to make adjustments in this law that protects me the consumer from such an unjust practice.
