

Mine, and other families in this area, would like the option to chose the channels we want to receive and pay for. As it is, my wife has about 6 channels she watches and me about 4. My children only watch about 5 or 6 including some of the channels my wife and I watch. 1 of the channels is on an expanded basic level which doubles our cable bill for that one channel, the rest we are not interested in. we think it is unreasonable for Suddenlink to decide which channels we receive and which ones we don't. Besides, with "a la carte", they can still make extra revenue on the "pay-per-view" offerings as many people with DVRs are willing to purchase PPV for viewing.
