

We in this area of South Texas have always been at the mercy of giant AT&T (formally SBC) with unacceptable service charging us outrageous bills and not providing us with more advanced infrastructure. We are being left out. Rules and policies have prevented cable companies from bringing their infrastructure to our rural communities south of Kingsville, Texas. The most reliable type of broadband is through cable, wireless and satellite internet are unreliable. Our children, schools, farmers, sick and disabled and communities are paying a high price. Please help our forgotten.
