

I found this statement and agree with it. What are you going to do about it? I know there are good people at the FCC, I met 2 of you at the media reform conference.

Here in 2009, the distorted reporting on the swine flu vaccine has been one of the greatest media frauds ever perpetrated. The media has in every way contributed to the widespread ignorance of the American people on the subject of vitamin D and natural immune-boosting defenses that could reduce swine flu fatalities. Rather than informing readers, the MSM has made it a point to keep the people stupid, and in doing so, the media has failed its only mission and betrayed the very audience it claims to serve.
