

Big Problem now is cost increase for Internet during this Govt.

Why Can't Govt regulate Price ?

I was paying around \$25 to 40 earlier now Comcast Increased to \$62 ,
it is too much for Browsing(Internet)

There is no competition, whatever they ask we have to give ? where
is Freedom for consumer ? if I want to choose another cable , no
body only comcast rules! I tried calling AT&T they say they do not
give Internet service(I have to Buy TV service to get Internet)
what kind of world we are in ??? how can AT &T Refuse service ??
what Govt is doing to help people ???

I ask Govt to help Stabilize prices for Internet, if possible please
please please

Make Internet Free like GPS that was done by earlier Govt.

We all pay lot of Tax money, what is benefit we are getting ??? Can
we get at least Internet free

Govt can launch Few Satellites(like they did it for GPS) and please
provide Free internet.

Internet is Freeworld, like Roads, we should be able to Tap into
Internet like Driveways! where are we still in Comcast Dark ages ????
