

I oppose Sorenson's 8/4/09 filing petition to have the Commission declare that consumers have only 1 default provider at a location, regardless of how many VP devices they may have or from whom it was acquired. Deaf people have the same right as hearing people to have more than one telephone provider and different brands telephones each with their own number. The safety claim is an outright lie. I suggest you see for yourself by asking two non-Sorenson VRS providers to install a VP in your office and make calls to a PSAP from each VP.
