Re: AT&T Response to Wireless Telecommunications Bureau Letter, DA 09-1737
(July 31, 2009); RM-11361; RM-11497

Dear Ms. Milkman:

On behalf of AT&T, I am writing to provide you with an update to AT&T's August 21, 2009 response to the Bureau's questions about the Apple iPhone. In our response, we explained that AT&T currently offers a variety of devices that enable VoIP applications to make use of our wireless network (including our 2G and 3G capabilities) and the devices' Wi-Fi connectivity. We further explained that the iPhone currently supports VoIP applications that make use of the device's Wi-Fi connectivity, but VoIP capabilities were not available on the iPhone for use on our wireless network. We also stated that we were taking a fresh look at the issue and would promptly notify the Commission of any such change in our policies. AT&T has completed its review of the matter and today we informed Apple that, effective immediately, AT&T consents to Apple enabling third-party VoIP applications for the iPhone that use our wireless network, including our 2G and 3G capabilities.

If you have any questions or need additional information, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink that reads "Robert W. Quinn, Jr." in a cursive script.

Robert W. Quinn, Jr.
