

I'm completely deaf. I got a cell phone that said it was tty compatible. No one knows how to use it. I've written to U.S. Cellular (my carrier) and recieved no reply. This service would be extrememly helpful to me. I went to them as a carrier because all my friends and family have them. Since my daughter is able to hear this makes our rates reasonable. I'd like to have a phone that I'm able to be on the web at all times so people are able to contact me when I'm away from my computer but I'm not able at this time to afford the phone requiered for that service.
