RE: Broadband Industry Practices (WC Docket No. 07-52)

Dear Chairman Genachowski

While there are some indications that the U. S. economy is slowly showing signs of growth, unemployment will still be a problem through 2010. I recommend the FCC slow down taking any action on changing how the Internet and wireless industry are currently regulated. We have benefitted here in Oklahoma with limited regulations on Broadband that has made it available all across our state.

I encourage the FCC to take a slow approach and look at all the ramifications of changing how the Internet and wireless markets currently operate.

Sincerely

Former Governor George Nigh
Oklahoma
