RE: Oct. 22, 2009 Open Meeting-Broadband Industry Practices-WC Docket 07-52

Dear Commission:

An effort to take a step forward toward greater broadband access may really equate to several giant steps backward if the FCC does not approach network neutrality and regulation of the wireless industry with careful, measured actions fully vetted by all stakeholders.

We're committed to growth and recovery here in Missouri, so let's not act where actions may not be necessary. The old adage of "if it ain't broke, don't fix it," certainly applies to the wireless sector today.

Sincerely,

A handwritten signature in black ink, appearing to read "Corey J. Mehaffy".
