*Mobile Wireless Competition*, WT Docket No. 09-66  
*Fostering Innovation and Investment in the Wireless Communications Market*, GN Docket No. 09-157  
*Spectrum for Broadband*, GN Docket Nos. 09-47, 09-137

Dear Ms. Dortch:

On November 3, 2009, the Association of Public Television Stations (“APTS”), represented by Larry Sidman, President and CEO, and Lonna Thompson, Senior Vice President and General Counsel, met with Paul de Sa, Chief, Brian Weeks, Business Analyst, and Phil Bellaria, Director, Scenario Planning, Office of Strategic Planning and Policy Analysis.

The participants discussed the role of public television stations in promoting and accelerating the adoption of broadband by the American public. The APTS representatives also explained that local public television stations are making full use of their broadcast spectrum to deliver high-definition programming, numerous multicast streams, and invaluable datacasting services to enhance education, public health, and public safety at the local and national levels.

Please contact the undersigned with any questions regarding this matter.

Sincerely,

/s/ Lonna Thompson
