Washington, DC 20554

Re: *Amendment of Part 27 of the Commission's Rules to Govern the Operation of Wireless Communications Services in the 2.3 GHz Band* (WT Docket No. 07-293) and *Establishment of Rules and Policies for the Digital Audio Radio Satellite Service in the 2310-2360 MHz Frequency Band* (IB Docket No. 95-91)

NOTICE OF ORAL EX PARTE PRESENTATION

Dear Ms. Dortch:

I am writing pursuant to Section 1.1206(b)(2) of the Commission's Rules to notify the Commission that yesterday, Jennifer McCarthy of NextWave Broadband, Inc., Kurt Schaubach of the National Rural Telecommunications Cooperative, Mary O'Connor of Wilkinson Barker Knauer, and I met on behalf of the WCS Coalition with Charles Mathias, Legal Advisor to Commissioner Baker, to discuss the issues pending in the above-referenced proceedings regarding the coexistence of Satellite Digital Audio Radio Service terrestrial repeaters and Wireless Communications Service broadband systems in the 2305-2360 MHz band. The parties discussed the July 2009 demonstration conducted in Ashburn, VA before the public and Commission staff, that it has been nearly a year since the draft order resolving the above-referenced proceedings began circulating for Commission vote, and that it is time to bring these proceedings to conclusion. The WCS Coalition also distributed the attached documents during the meeting.

Pursuant to Sections 1.1206(b)(2) and 1.49(f) of the Commission's Rules, this letter is being filed electronically with the Commission via the Electronic Comment Filing System. Should you have any questions regarding this presentation, please contact the undersigned.

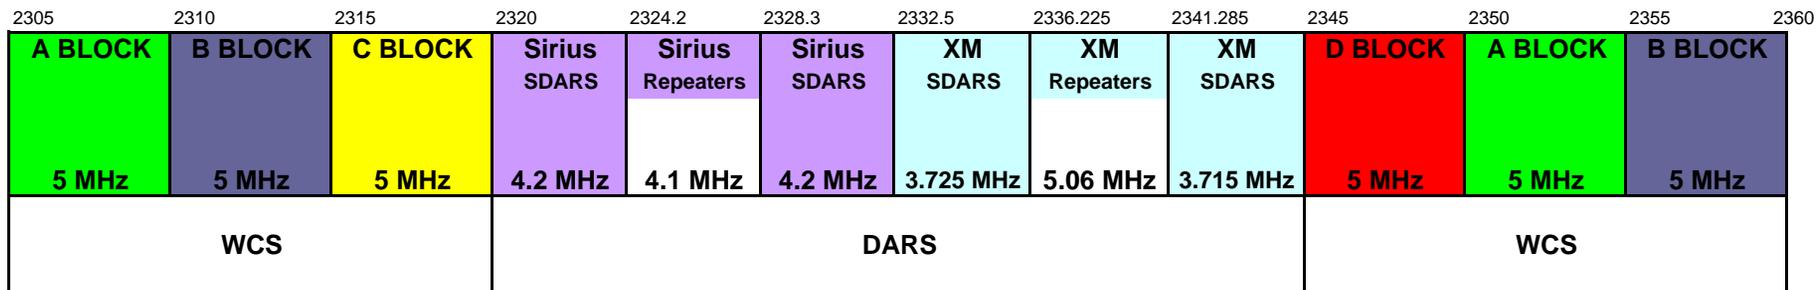

Respectfully submitted,

/s/ Paul J. Sinderbrand

Paul J. Sinderbrand
Counsel to the WCS Coalition

cc: Charles Mathias

WCS/DARS BANDPLAN

WCS Compromise Spectral Mask

- Minimum OOB attenuation for user stations subject to less restrictive mask:

$55 + 10 \log (P)$ on first 4 MHz of DARS band

$61 + 10 \log (P)$ on next 4 MHz of DARS band

$67 + 10 \log (P)$ in center 9 MHz of DARS band

- Less restrictive mask only available for: (a) battery-operated user stations transmitting at no greater than 250 milliwatts average EIRP on A and B Blocks; (b) battery operated user stations transmitting at no greater than 50 milliwatts/1 MHz average EIRP between the 2315-2318 MHz and 2347-2350 MHz portions of the C and D Blocks; (c) battery operated user stations transmitting at no greater than 30 milliwatts/1 MHz average EIRP between the 2318-2320 MHz and 2345-2347 MHz portions of the C and D Blocks; and (d) AC-operated user stations transmitting at no greater than 2 Watts average transmitter output power.
- Less restrictive mask only available if device incorporates transmitter power control.
