RE: Broadband Industry Practices (WC Docket No. 07-52)

07-52

Dear Chairman Genachowski,

I am writing to express my concern about the FCC's upcoming announcement on network neutrality. Heavily regulating wireless networks will reduce investment in Connecticut and cut into job growth.

The rapid rise of the wireless market is a great success story here in Connecticut. Nearly all residents and businesses have access to advanced wireless phones and networks, while the strong, competitive market keeps bringing new innovation. This success has been achieved because of the absence of government interference. It's imperative that the FCC retain the spirit of innovation and entrepreneurship that has built the robust wireless and online networks we have today.

The FCC can take another step by avoiding network neutrality regulation of broadband deployment. Bringing broadband to all areas of the nation also requires investment in networks, well-paying local jobs and the technology needed for our cities and towns to grow new businesses that depend on communications.

I think we all agree that a fair and open Internet is important, but your proposed regulations on traditional and wireless broadband service will shut off the Internet to many in Connecticut and further cost us jobs and investment. Don't close the door to opportunity and jobs with unnecessary new regulations.

I thank you for your attention.

Sincerely,

Stephen A. Bull
President
