**Re: Ex Parte Notification - Investigation of the Spectrum Requirements
for Advanced Medical Technologies – ET Docket No. 06-135
Amendment of Parts 2 and 95 of the Commission’s Rules To Establish
The Medical Data Service at 401-402 and 405-406 MHz – RM-11271**

Dear Secretary Dortch:

This letter provides notice of a telephone conference that took place yesterday, December 22, 2009, between representatives of Medtronic, Inc., and Steve Jones of the Commission’s Office of Engineering and Technology (“OET”) laboratory. Medtronic was represented by Charles Farlow, Josh Francis, and Greg Haubrich, Phillip Inglis of TRP, Inc., and the undersigned counsel to Medtronic. The purpose of the call was to discuss test procedures associated with the measurement of MedRadio transmit power levels under the current rules.

This notice is being filed in the above-referenced dockets because, during the phone call, Medtronic noted that its pending Petition for Reconsideration has requested the FCC to continue to allow MedRadio transmit power measurements to be made on the basis of average power, as was the case under the prior MICS rules. Please do not hesitate to contact the undersigned if the Commission has any questions regarding this letter.

Sincerely,

David E. Hilliard
