

Stop the use of TTY service to perpetuate criminal fraud. I am a business owner and receive at least one call a month from a so called "hearing impaired individual" that is trying to rip me off. Our government actually pays the bill for this???

Seriously take that money and send every registered citizen of America a check to stimulate our very sick economy. DUH If you need proof read the horror stories on the internet from cities across the US being inundated with these calls. In order to qualify for a government help program you must register and provide trackable information otherwise keep your calls limited to your own country.
