

I wanted to say thanks for looking into this situation about Net Neutrality. It's very important that the Net stay open and not be controlled by corporations who's only goal is to make money no matter what the cost and that would leave a lot of good people out and a lot of good innovation going on that we are seeing. We are a intelligent people and have a lot to gain in progress with an OPEN internet access. Do not let the big companies run the game on this and give you the SOB story. They are already doing fine as they are. In fact I think they have way too much control already and are using censorship, etc. If we are to keep our country strong and great in innovations, creativity, we need to be able to know that no one is going to control the lines and put a stop to something good that's been created and lose the credit for that. You get what I'm saying. Thanks for the listening.
