Re: American Network Inc. Annual Report

Dear Ms. Dortch:

Attached, as required by the Federal Communications Commission in its January 7, 2009 Public Notice certifying American Network, Inc. as a provider of Internet Protocol Relay Service (IP Relay), Video Relay Service (VRS), and Internet Protocol Captioned Telephone Relay Service (IP CTS),^{1/} is the annual report of American Network certifying compliance with the provisions of Section 64.604 of the rules of the Commission. Please contact the undersigned with any questions or requests for additional information.

Respectfully submitted,

/s/ Russell H. Fox

ANNUAL REPORT OF AMERICAN NETWORK, INC.

Pursuant to Section 64.606(g) of the rules and regulations of the Federal Communications Commission (“FCC” or “Commission”)^{1/} and the direction provided by the Commission in its Public Notice issued January 7, 2009^{2/} American Network, Inc. (“ANI”) hereby submits its annual report certifying compliance with the provisions of Section 64.604 of the rules.

I. UPDATE TO APPLICATION-BASED PRESUMPTIONS

The following supplies the FCC with updated information, as appropriate, regarding the provisions of the FCC’s rules with which ANI is obligated to comply as a provider of Video Relay Service (“VRS”), Internet-Protocol (“IP”) Relay and IP Captioned Telephone Service (“IP-CTS”) service.

^{1/} 47 C.F.R. § 64.606(g) (2008).

^{2/} *Notice of Certification of American Network as a Provider of Internet Protocol Relay Service (IP Relay), Video Relay Service (VRS), Internet Protocol Captioned Telephone Relay Service (IP CTS) Eligible for Compensation from the Interstate Telecommunications Relay Service (TRS) Fund*, CG Docket No. 03-123, Public Notice, 24 FCC Rcd. 80, n.11 (2009) (requiring American Network to submit an annual report each year by January 7th “evidencing that they are in compliance with Section 64.604”).

A. Operational Standards

1. Communications Assistants – 64.604(a)(1)

ANI has entered into an agreement with URRelay, Inc. (www.urrelay.com) (“URRelay”) for that company to handle all of ANI’s IP Relay calls. ANI retains strict controls over URRelay’s operations to ensure that it conforms with the FCC’s rules. ANI’s own personnel provide IP CTS services. ANI has entered into an agreement with Cleveland Hearing and Speech Center (www.chsc.org) (“CHSC”) for that entity to provide some ANI customers VRS services (although all such calls are first handled by ANI). The remainder of ANI’s customers receives VRS services from ANI directly. As required by the rules, the CAs employed by ANI directly and those used by URRelay and CHSC are qualified, skilled and well trained, providing, where required, a typing speed of at least 60 words per minute. CAs stay with calls for the required period. ANI assures that its CAs and those employed by URRelay and CHSC make their best efforts to accommodate a user’s requested CA gender.

2. Confidentiality and Conversation Content – 64.604(a)(2)

ANI ensures, through training and supervision, that its CAs and the CAs employed by URRelay and CHSC adhere to the obligations established by Section 64.404(a)(2) of the rules regarding confidentiality and conversation content.

3. Types of Calls -- 64.604(a)(3)

Consistent with regulatory obligations, ANI, through its CAs and the CAs employed by URRelay and CHSC, does not refuse calls or limit the length of calls. All calls, including long distance calls are completed without charge to the consumer. While ANI does not handle (directly or through URRelay or CHSC) the types of calls that have been waived by the FCC, the company will make reasonable efforts to address the technological issues that prompted the

waivers and will handle those types of calls when those waivers expire or seek a further waiver of the obligation to handle those calls.

Voice Mail and Interactive Menus -- ANI CAs (directly and through the CAs employed by URRelay and CSHC) inform users of the presence of any recorded messages and relay information conveyed by the recording. Similarly, CAs inform callers of any interactive menus that may be encountered in placing a call and assist callers in working through the menu to route their call to the preferred location or retrieve the information they want. CAs also assist users in leaving voice messages on voice mail systems.

4. Handling of Emergency Calls -- 64.604(a)(4)

While Section 64.604(a)(4) does not apply to IP-based TRS providers, Section 64.605 does. ANI passes any emergency calls using its VRS and IP Relay systems to the appropriate public safety answering point (“PSAP”) with automatic number identification, the caller’s registered location, information indicating that the call is being placed by ANI, and the CA’s identification number. All VRS and IP Relay 911 calls are routed through the use of automatic number identification and, if necessary pseudo-automatic number identification, by ANI’s interexchange service provider using the carrier’s dedicated wireline E911 network. ANI complies with the 911 call handling requirements with respect to IP-CTS emergency calls, to the extent required by the FCC’s rules and decisions and as technically feasible.

ANI and URRelay have implemented a system to prioritize emergency calls so that they are answered before non-emergency calls. ANI ensures that its CAs (employed by it, URRelay, and CSHC) are trained to request the caller’s name and location at the beginning of any emergency call, except where the caller’s registered location information is already on file with ANI. In the event one or both legs of an emergency call is disconnected, ANI ensures that those

CAs are trained to re-establish the call by contacting the calling party, the PSAP, or both. Information obtained by ANI as a result of assisting with an emergency call is used only for emergency or law enforcement purposes.

5. STS Called Numbers -- 64.604(a)(5)

The Commission has waived these requirements for VRS, IP Relay, and IP-CTS services provided by ANI and others. At such time as it may become possible for this waiver to be lifted, ANI expects to comply with any established requirement.

B. Technical Standards

1. ASCII and Baudot -- 64.604(b)(1)

The ASCII and Baudot communication requirement contained in this rule is waived for VRS and IP-CTS. This requirement is not relevant to ANI's IP Relay Service because it uses Internet protocol and is therefore not capable of communicating with TTY equipment using ASCII and Baudot format at any speed generally in use.

2. Speed of Answer -- 64.604(b)(2)

ANI and the CAs it employs directly or indirectly meet or exceed the speed of answer requirements of this section. ANI and URRelay continually measure speed of answer, with regular reports to system management. Sufficient work stations are available and sufficient CAs are scheduled at all times to ensure callers are not faced with lengthy waits for service.

3. Equal Access to Interexchange Carriers -- 64.604(b)(3)

The requirements of this provision of the regulations have been waived for VRS, IP Relay Service, and IP-CTS providers provided that they provide free long distance service to end users. American Network provides such free long distance and is therefore not obligated to comply with this regulation.

4. TRS Facilities -- Continuous Operations -- 64.604(b)(4)

ANI maintains continuous operation of its VRS, IP Relay Services, and IP-CTS facilities, accepting calls twenty-four hours a day, seven days a week. System redundancy features and uninterruptible power supply provisioning ensure that technical problems do not impede the availability of services.

5. Technology -- 64.604(b)(5)

The requirement is not applicable to ANI because SS7 technology is not compatible with the services offered.

6. Caller ID -- 64.604(b)(6)

For its VRS and IP-CTS services ANI transmits caller ID information to the public network. Current technology does not permit ANI to transmit caller ID information to the public network using its IP-Relay service. When future technology reasonably permits, ANI will transmit caller ID information to the public network using its IP-Relay service.

C. Functional Standards

1. Complaint Log -- 64.604(c)(1)

As required by this section of the regulations, ANI maintains a continuous log of any consumer complaints received, with information on the date of the complaint, description of the complaint, the resolution, and the date resolved. Separate logs are kept for each service provided (VRS, IP-CTS, and IP-Relay). As required, a report of the number of complaints received has been, and will continue to be, provided to the FCC each July first.

2. Contact Person -- 64.604(c)(2)

The designated TRS contact for ANI is, as described in the FCC's database

(http://www.fcc.gov/cgb/dro/trs_providers.html):

Ellen Altamirano
American Network, Inc.
142 East 39th Street
New York, NY 10016
Voice: 212-200-2010
Fax: 212-758-3453
ealtamirano@american.net

3. Public Access to Information and Consumer Outreach -- 64.604(c)(3)

ANI ensures that potential users are made aware of its services through its websites (www.phonecaption.com, www.freerelay.com, www.american.net, www.dialroundvrs.com, www.dialaroundrelay.com and www.americanvrs.com), advertising, consumer trade show presentations, meetings with user communities, distribution of informational materials, direct mailing to consumers, online communication, and other promotional methods.

4. Rates -- 64.604(c)(4)

ANI does not assess any charge to users of its VRS, IP-CTS, and IP Relay Services, even for calls that are long distance.

5. Jurisdictional Separation of Costs -- 64.604(c)(5)

Because of technical difficulty in identifying the interstate or intrastate jurisdiction of VRS, IP-CTS, and IP Relay Services calls, each service is currently reimbursed from the Interstate TRS Fund. At such time as the FCC may determine that it is possible to jurisdictionally separate costs for VRS, IP-CTS, and IP Relay Services, ANI will comply with cost separation instructions contained in this provision of the regulations and otherwise established by the Commission.

6. Complaints -- 64.604(c)(6)

ANI's user complaint procedures are described below and the company maintains a complaint log and submits a summary to the Commission each July 1st. ANI understands that complaints about its VRS, IP-CTS, and IP Relay Services may also be filed directly with the FCC, and the company will cooperate fully in any investigation or other procedure the Commission may undertake to resolve complaints it may receive about ANI's services.

American Network provides for consumer complaints through an e-mail to the company. It expects to initiate soon an online form available on the company's web site to submit complaints as well. CAs are trained to direct consumers to submit complaints via e-mail (and in the future to the web-based complaint portal) or to the compliance officer or a designee. The compliance officer or designee regularly monitors the complaint e-mail address (and in the future the web-based complaint facility) to ensure complaints are responded to promptly. Complaints beyond the ability of the compliance officer or designee to resolve are escalated to a higher level officer at the company. Complainants are also informed, as part of the response to any complaint, that they may contact a designated higher level company official or the FCC if they are dissatisfied with the response.

In American Network's experience, many matters and questions – particularly technical questions – that might otherwise result in a consumer complaint can be resolved by provision of timely information. Accordingly, American Network provides a variety of on-line support resources, including a comprehensive “frequently asked questions” page, to provide consumers with immediate resolution to many questions or problems.

7. Confidential Treatment of TRS Customer Information -- 64.604(c)(7)

All customer information about users of ANI's VRS, IP-CTS, and IP Relay Services is treated confidentially and is not sold, distributed, shared, or revealed in any way by ANI or any of its employees, unless compelled to do so by lawful order.

D. Other Requirements

1. Notification of Substantive Changes -- 64.605(f)

ANI notified the FCC that it intended to provide Spanish language services (see letter to FCC dated November 17, 2009) and will notify the FCC of any other substantive changes to its VRS, IP-CTS, and IP Relay Services within 60 days of when any such changes occur.^{3/}

American Network will, at the time any such notification is made, also certify that the company's VRS, IP-CTS, and IP Relay Services continue to meet minimum federal standards after implementing the substantive change.

2. Annual Reports -- 64.605(g)

As it has here, ANI will continue to provide the FCC with annual compliance reports on its VRS, IP-CTS, and IP Relay Services, transmitting such information as the Commission may require for such reports.

3. Other

American Network meets or exceeds any and all other standards for VRS, IP-CTS, and IP Relay Services that have been established by the FCC and will meet any additional standards that may be set by the FCC in the future.

^{3/} ANI will provide the FCC with another notice when it actually begins to provide Spanish-language services.

II. ADDITIONAL OBLIGATIONS IMPOSED POST-APPLICATION

A. Emergency Call Handling Requirements

See Section I(A)(4), above.

B. Customer Registration

1. Designation as Default Provider and Number Assignment -- 64.611

ANI provides VRS and IP Relay users the opportunity to register, at the web sites noted in Section I(C)(3) of this Report, as their “default provider,” pursuant to which ANI will either facilitate the user’s valid number porting request or assign, consistent with the FCC’s rules and decisions, the user a geographically appropriate North American Numbering Plan (“NANP”) number. Thereafter, ANI will route and deliver all of the user’s inbound and outbound calls, unless the user chooses to place a call with, or receives a call through an alternate VRS provider. ANI will not assign a proxy or alias for a NANP telephone number to any user.

As the default provider for its VRS and IP Relay customers, ANI obtains from users current routing information, including IP addresses or domain names and user names, and provisions that information in internal databases and the TRS Numbering Directory (Neustar’s iTRS ENUM database). ANI provisions routing information to the TRS Numbering Directory only for those users for which it has been designated the default provider. ANI queries the TRS Numbering Directory to obtain accurate routing information for all VRS and IP Relay users.

2. Registered Location Information -- 64.605(b)(4)

Prior to initiation of service, ANI obtains from each registered user of its VRS or IP Relay services the physical location at which the service will first be used. Users are informed of the importance of updating their registered location. ANI users can easily update their registered

location information via an e-mail to the company (and ultimately through a portal on the company's website).

3. User Notification and Acknowledgement -- 64.611(f)

ANI maintains information on its website and in its promotional materials that addresses the following issues: (1) the process for obtaining a ten-digit number from ANI; (2) the portability of ten-digit numbers assigned to VRS and IP Relay users; (3) the process for submitting, updating, and confirming receipt by ANI of registered location information; and (4) an explanation emphasizing the importance of maintaining accurate, up-to-date registered location information in the event the user needs to place an emergency call using ANI VRS. ANI obtains and keeps a record of affirmative acknowledgement by every Registered Internet-based TRS User of having received and understood this advisory.

III. Conclusion

As demonstrated above, ANI continues to comply with all of the regulatory requirements applicable to its provision of VRS, IP-CTS and IP Relay Services.

Respectfully Submitted,

/s/ Russell H. Fox
