

I support Net Neutrality for everyone. An open internet is the only way to ensure the free flow of ideas and the civil rights of all citizens of our great nation.

Without Net Neutrality the huge Telecom corporations will take over and censor and control everything on the Internet. These huge corporations would pick and choose what they want to allow whether it be businesses, news, blogs/opinions, groups, and entertainment, to push their agenda on the rest of us.

Another area that would be effected would be the cost of broadband which is already costly. I am a home bound woman of modest means. I use the internet for my news, community, telephone, email, and TV shows. It is already costly for me. I know I would not be able to afford the Internet any longer should there be no Net Neutrality because the cost would become prohibitive for me while the quality of and the free flow of ideas would become nearly non-existent.

I support Net Neutrality so that the Internet will continue to be strong, vibrant, and free of the stranglehold of corporations that care only about their profits.

Thank you for hearing me out on this very important matter. Thank you for the work you do so we can have the best possible Internet for all American citizens.

Sincerely, Mrs. Muffy Bernier
