

Please show a leadership position and abolish the hegemony five corporations have over 100% of global media. Time/Warner/AOL - Rupert Murdoch, Betschelmann, Comcast, AT&T have complete control over all international media. America needs to maintain "Internet Neutrality". The internet should not be owned/dominated by a corporate cartel which has complete hegemony over online communication.

Comcast recently bought NBC network, which further entrenches the complete hegemony this corporate cartel has over global media. That recent merger was bad for consumers, bad for freedom of speech and diversity of ideas and bad for cable customers who will get "scorched" with fewer choices and higher prices on their cable bills.

Comcast and AT&T want to completely dominate the internet. The lack of choice for consumers will cause prices of internet, phone and TV cable services to become more expensive. Consumers will lack options as competition is squelched among global media providers.

Please maintain "Net Neutrality" to ensure democracy, freedom of speech, diversity of thought and to protect consumers from being forced to pay higher prices.

Thank you for your serious consideration of my concerns.
