

Please keep the Internet Free and open to the people rather than controlled by private companies. A free press is essential to our nation's well being. The Internet belongs to the public and should not be controlled by private interest for profit.

Telephone and cable as well as mainline media are already too biased and are mostly left-leaning. We need the free Internet to remain such.

There are areas that should be controlled such as pornographic sites and those used to promote terrorism and hate.

But the Internet itself should not be restricted. The Mosaic Law has been our best national protection and if we can acknowledge the Golden Rule it will go a long way to regulate the Internet and protect our children .

Let's acknowledge without God all man's ways are corrupt.
