

Net neutrality is absolutely vital to our nation and to the world. Handing over control of the internet to giant corporations is without a doubt the worst possible thing the FCC could ever do and if it does happen will go down in history as one of the greatest crimes against freedom ever committed. Keep your grubby hands off the peoples internet FCC! I for one will take steps to initiate and support criminal RICO charges being filed against any FCC board members who give or attempt to give control of the internet to giant corporations. Make no mistake FCC you are here to serve us the people NOT Comcast or ATT and if you betray us we the people will rise up and prove that we have always had the power and authority to bring rouge government to justice. This is no joke, the internet is the last chance for freedom and justice we have as a people and we will defend it like cornered badgers. I am watching this issue very closely and will be investigating all corrupt FCC board members who vote against net neutrality and not only reporting what I find to the world but also aggressively supporting RICO prosecutions. Any corporations attempting to buy FCC board member votes will likewise have to answer to the people. Our internet will not end up like China's censored abomination (thanks to Google). No way!

Very Sincerely,

Adam Ruff
