

I urge all to let the Internet remain in the hands of users and innovators like us? Let us not allow a handful of telephone and cable companies determine which Web sites we see and which we don't? I Urge the FCC to protect Net Neutrality once and for all.

The open Internet is important to the American Public and the world. We need the FCC to withstand pressure from phone and cable companies and make Net Neutrality the rule of the road.

More than 1.7 million Americans have already called on Washington to protect Net Neutrality â€” the rule that keeps control over the Internet in the hands of the people who use it.

The FCC must now act decisively in the public interest by enacting strong rules that keep the Internet free from blocking, censorship and discrimination.

Don't give in to pressure from AT&T, Comcast, Verizon and their lobbyists. Stand up for and support a strong Net Neutrality rule.

I personally have gained much knowledge in the areas of finance, world affairs, history, science, culture and a multitude of other subjects due to the openness and free communication the web offers. The internet has helped make me a better more productive and responsible person. Please protect the 1st Amendment of the United States. It is all we have left. Take it away and you take away the God given right of all Americans and people of the world to communicate and share ideas freely. Freedom of speech is the very foundation of life, liberty and the pursuit of happiness. If we start restricting this right we are going down a path of suppression and negative control of all humanity.

Thank you.
