Re: GN Docket No. 09-191

Dear Chairman Genachowski and Commissioners:

Rainbow PUSH is actively engaged in assuring that the Commission shares our commitment to universal broadband deployment and adoption. As stated in our October 2009 filing regarding the Notice of Proposed Rulemaking on the Open Internet, we want to make sure that no proposed regulations have the unintended consequences of making broadband inaccessible and unaffordable to the underserved communities we represent.

Our community is the least likely to have and could benefit the most from life enhancing broadband technology. We continue to call on the Commission to conduct a facts-driven analysis of the possible impact that its proposed regulations could have on deployment and adoption rates.

While the country as a whole appears to be headed out of recession, economic disparities within Black America are at near depression area levels. One hundred percent broadband deployment and adoption holds the promise of providing the technological tools to millions of Americans to have access to jobs, telemedicine, community events and online education - to name a few.

We reiterate our strong desire that the Commission focus on 100% deployment and adoption so that the least of us who have yet to experience broadband will be able to enjoy its benefits.

Sincerely,

Kimberly Marcus  
Executive Director
