

Without internet neutrality the internet will become a mindless and banal landscape devoid of innovation and cultural integrity. The internet has changed the world for the better in that everyone who has access can be heard. Anyone with something to share currently has a platform to express their world view. Keeping the internet in the hands of the people is essential for maintaining a free democratic society. Countries that control and censor the internet are usually associated with overt oppression, be it communism, Religious fascism or any other ideology of control. The world is a better place because the internet is what it is, and the internet is what it is because everyone has a hand in shaping it. Thank you
