

To Whom it may concern,

I am writing to let you know that freedom of information over the internet is akin to freedom of speech. Freedom is a bedrock integral right of Americans and something we value with an inspiring intensity. And we should, one need to look to the example of China where people are unable to know even their own history let alone the actions of their own county. The Chinese government restricts, censors and controls the information available to its citizens in order to secure its morally corrupt policies. Lets maintain our own freedom which is in jeopardy of being controlled by companies who are infinitely more interested in their bottom line then they are our rights and freedom. More than a million Americans have called on Washington to protect Net Neutrality " the rule that lets me control my Internet experience, and protects me from profit driven censorship.

It's now time for the FCC to respond and enact strong rules to keep the Internet free from blocking, censorship and discrimination.

This is an issue with real consequences for real people. I am trusting you to represent me and the interests of the people over the interests of companies which are not people and are not interested in whats best for society. Please don't give in to pressure from AT&T, Comcast, Verizon and their lobbyists. Stand with me and other Americans in support of a strong Net Neutrality rule.

Sincerely,

Jennifer Livingston
