

More than a million Americans have called on Washington to protect Net Neutrality – the rule that lets me control my Internet experience.

It's now time for the FCC to respond and enact strong rules to keep the Internet free from blocking, censorship and discrimination.

This is an issue with real consequences for real people. Don't give in to pressure from AT&T, Comcast, Verizon and their lobbyists. Stand with me and other Americans in support of a strong Net Neutrality rule.

In a national emergency, the internet is an invaluable tool and needs to be free and easily accessible. It may be the only free press we will have left

This is your watch FCC. It is up to you to keep this country from moving still further into the control of corporate interests and profit motives. Please keep the interests of the entire populace first and foremost... especially the economically challenged who would not likely be able to afford a price structure imposed by private enterprise should it take control of the internet. We've seen what bank control over our financial institutions have done to the economy. Please, please, please... keep your wits about you and don't allow the same to occur with our currently free and open internet. History is watching what you allow or do not.
