In re: 700 MHz Interoperable Broadband Public Safety Broadband Network PS Docket 06-229

Dear Ms. Dortch:

On January 14, 2010, Roger Quayle, Chief Technology and Co-Founder of IPWireless, Andy Smith, Vice President of IPWireless, and I, the undersigned, visited with Ruth Milkman, Chief, Blaise Scinto, Steve Zach, and Paul Manmouth (via telephone bridge) to discuss issues related to the development and implementation of a broadband network in the pending AWS-3 band.

IPWireless presented a detailed presentation that supports the 3GPP path that would provide an immediate opportunity in the AWS-3 band. IPWireless noted that the FCC can maximize the potential of AWS-3 by allowing nationwide TDD operations in the band to provide broadband services. Last, IPWireless responded to specific questions posed by the Wireless Bureau team regarding high /low site deployments of broadband infrastructure and the ability of IPWireless user equipment that would operate in the AWS-3 band.

Respectfully Submitted,

Joe Hanna, President
