Re: GN Docket No. 09-51
A National Broadband Plan for Our Future

Dear Ms. Dortch:

On January 26, 2010, the undersigned met with Blair Levin to discuss the National Broadband Plan.

The topics discussed at this meeting were consistent with Cisco's past filings in this docket, including the need for a robust aspirational goals of at least 100 Mbps, the need for broadband physical infrastructure capable of being upgraded as applications improve, and innovation in the set-top box market. In particular, the higher level of innovation in set-top boxes in the United states compared to international markets and the costs of past Commission regulation of set-top boxes were discussed.

Please direct any questions relating to this filing to the undersigned.

Respectfully submitted,

A handwritten signature in blue ink, appearing to read "Jeffrey A. Campbell", is written over a horizontal line.
