8. Process description

- The Agent chooses the store and selects the device that best suits with his requirements.
- The store registers the customer's order at Microsoft's Management Center.
- The mentioned order is automatically received by the Agency.
- The agency reviews/analyzes the funding request, based on the labor regime to which each agent belongs , by comparing the provided data with the information included on the Agency's database.
- The Agency either approves or rejects the funding.
- The agency sets the number of installments depending on working arrangements (labor regime) and salary level of the agent.
- The store notifies the funding approval to the agent and informs him that he should sign the agreement at the Agency.
- The agent signs his acceptance at the Agency, this implies his approval with the discount.
- The store creates/emits an invoice and delivers the equipment.
