

The Lunenburg County Sheriff's Office has a new Office that was built within the past four years. Until I installed a wireless telephone antenna booster in our office no one could talk on their cell phones without going outside of the building. This has been the cause of countless missed calls. Some of those calls being very important ones. On many occasions when someone would get a call it would ring but you couldn't answer it. When that happened you would have to get up from whatever location you were in and run to an exit before it stopped ringing so you wouldn't lose your call. With the new antenna we now have cell phone service throughout our office. The wireless cell phone antenna has been the most significant equipment addition to our office since we moved in.

Thanks for your concerns:

Major A. J. Moses
