Re: Announcement and presentation of the 700MHz D-Block reallocation for public safety website., PS Docket No. 06-229; WT Docket No. 96-86.

Dear Chairman Genachowski:

The Association of Public Safety Communications Officials is proud to announce the launch of our www.D-Block.net website which represents a united public safety position on the need for the reallocation of the 700MHz (D-Block) to support America's first responders.

The purpose of the website is to educate policy makers about the need to reallocate D Block to public safety to build a nationwide public safety interoperable mobile broadband network. Our goal is to continuously post new information on the website that will build the strongest possible case for allocating the D Block to public safety.

Thank you for your work to improve public safety. We look forward to our continued work together on this issue.

Respectfully submitted,

/s/

Robert M. Gurss
