## Federal Communications Commission

Campbell - Shaw, Inc. and its divisions:

**CSI Multimedia; Venue Specialist Consultants, Designers, Integrators and Dealers of Sound, Lighting and Multimedia Projection Systems**

**Rick Shaw and Company; Acoustical Environmental Impact Studies, Acoustical Enhancement, Acoustic Material Sales**

Campbell-Shaw is asking the FCC to protect wireless microphones from interference and ensure that wireless microphone users will be eligible for licenses.

Campbell-Shaw's clients who use wireless devices (such as wireless microphones, intercoms and in-ear monitors) include vocalists, musicians and actors in theaters, houses of worship, corporate and municipal buildings and sports venues. Performances live and or recorded and or broadcast.

The use of clear channel wireless enables critical real-time, crystal clear communication with congregants, constituents, live audiences, etc., it allows freedom of movement over a stage, altar, auditorium, etc., it enables creative and innovative productions, etc., it enables audiences an enhanced experience for sporting events, etc. There are negative consequences if any production experiences interference.

Campbell-Shaw is asking the FCC that any rule changes that the FCC adopts will allow Campbell-Shaw to obtain an FCC wireless microphone license and be allowed to continue providing the services and products that Campbell-Shaw is providing now.

Thank You

Rick Shaw,  
President Campbell-Shaw, Inc.

Venue Specialist Consultants, Designers, Integrators and Dealers  
Of Sound, Lighting and Multimedia Projection Systems
